Opening a PDF

This PDF was made with Save as PDF in mdEditor. Opened in mdEditor, its text, headings, and images come back as Markdown.

Headings and paragraphs

A long paragraph is wrapped onto several lines in the PDF. Opened in mdEditor, it becomes one paragraph again, wherever the lines were broken. English lines are joined with a space, and Japanese lines are joined directly. Check that this paragraph comes back as one.

A smaller heading

A paragraph under the smaller heading.

Image

Table

Item	Cost
Prototype	120
Testing	45

Only the text of the cells remains; the table does not come back as a table.
